1.) Solve the following system algebraically. Then GRAPH to check your answer

$y = 4x + 5$

$y = -2x - 13$

2.) Solve the following systems below

$x + y = 3$

$x = 3y - 5$

3.) Solve the following systems below

$-3x + y = -2$

$4x + 2y = 6$

4.) Solve the following systems below

$x = y - 4$

$2x - y = -5$
